WHAT WE INSTALL

Outside, inside, and set up for you

Mason-Dixon LED Co. is a York, PA installer of Govee permanent outdoor lights. We also install and set up Govee lights inside the house, so everything runs from one app.

Permanent Outdoor Lights

Mounted along your roofline, peaks and soffits, with hidden wiring. Up 365 days a year, 24/7.

Permanent Outdoor Lights Pro

Govee's Pro line, installed the same way: planned layout, straight runs, controller placed out of sight.

Govee lights indoors

Most Govee indoor lights, mounted, connected to your Wi-Fi and added to the Govee Home app.

Other permanent systems

Along with Govee, we do long-term installs of other permanent lighting systems. Ask us about yours.

EVERYDAY USE

Running your lights

Everything happens in the **Govee Home app**: pick warm white for everyday light, holiday scenes in season, team colors on game day, or any color you like. Save your favorites as scenes and put them on a schedule, such as turning on at sunset, so the house lights itself every evening.

Everyone in the house can control the lights from their own phone once they're added in the app. If you'd like a scene set up for a holiday or event, call or text us.

CARE GUIDE

Looking after permanent lights

Permanent lights need very little. These few habits keep them working and keep the warranty intact.

01 **Leave the controller plugged in**

The lights run from a small controller and a power adapter on a standard outdoor outlet. Nothing is hardwired. If the lights stop responding, unplug the adapter for about ten seconds and plug it back in.

02 **New Wi-Fi or new router?**

Re-connect the controller in the Govee Home app using the new network name and password. If it won't connect, we can do it for you.

03 **Let ice and snow melt on their own**

The lights stay up through every season. Don't chip ice off them or climb onto a snowy roof to clear them.

04 **Keep pressure washers away**

When the house is washed, ask for a gentle rinse near the roofline, and don't point a pressure washer at the lights or the controller. A soft, damp cloth is all the lights ever need.

05 **Don't cut, splice or move a run yourself**

Govee warns that cutting or splicing the lights incorrectly can damage them and void the warranty. If you want a run moved, shortened or extended, call us.

06 **Tell other contractors the lights are there**

Roofers, gutter crews and painters work right where the lights are mounted. A quick heads-up avoids knocked or unplugged runs.

Something not right?

Every install includes two months of complimentary adjustments. Call or text (717) 341-4261 and we'll come back and fix it.

WARRANTY

Who covers what

Different products carry different warranties. Govee covers the lights themselves; we cover our installation work.

PRODUCT OR WORK	COVERED BY	COVERAGE
Govee Permanent Outdoor Lights, including the Pro line	Govee	**3 years** Limited warranty from the date of purchase.
Most other Govee lights, including indoor lights	Govee	**1 year** Limited warranty from the date of purchase.
Our installation: mounting, connectors, extensions and setup	Mason-Dixon LED Co.	**2 months** Complimentary adjustments. If an installed component fails under normal use, we repair or replace it at no labor charge.

Govee's terms come from Govee's own website (us.govee.com, checked October 2026) and can change. Warranty length can differ by model, so check your model's product page and keep your receipt or order confirmation. Govee handles product warranty claims. Our two-month coverage doesn't include storm, animal or impact damage, or changes made by others; your installation agreement has the full terms. Mason-Dixon LED Co. is an independent installer, not affiliated with or endorsed by Govee.

GOOD TO KNOW

The facts

75%
less energy than incandescent bulbs for LED lights, which also last 25 to 50 times longer (U.S. Department of Energy).

50,000
hours: Govee's rated lifespan for its permanent outdoor lights (Govee).

365
days a year, 24/7. Installed once, never hung or taken down again.
